DINING TABLE ELON

The Elon table base in dining table height combines modern design with well-thought-out functionality. Thanks to the integrated mechanical levelling system, the base compensates for uneven surfaces of up to 18 mm, ensuring a secure and stable stand even on challenging ground such as paved surfaces. The high-quality aluminium base with a durable powder-coated finish is available in silver and black and can be flexibly combined with round table tops from Ø 60 to 80 cm as well as square table tops from 60 x 60 cm to 80 x 80 cm. The practical flip-top mechanism allows the tables to be nested sideways, making Elon particularly suitable for flexible use in restaurants, hotels, and public spaces. The successful combination of aesthetics, stability, and intelligent functionality was honoured with the Red Dot Design Award 2017.

- Perfect stability on any surface – integrated levelling compensates for unevenness up to 18 mm
- Flexible and space-saving – tilting mechanism enables side stacking of the tables
- Excellent design – multi-award-winning Table base with Red Dot Design Award 2017
