

CHILD SEAT **KORU KIDS**

Restaurant chairs can be quickly converted into a high chair for children. The elegant and space-saving Koru Kids child seat, which is made of soft, dimensionally stable PE material, is simply placed on the chair and attached firmly to the seat and the backrest with two adjustable straps with Velcro fastening. The ribbed seat prevents unwanted slipping around. An integrated three-point safety belt in the seat provides additional safety for small children; it can, however, easily be removed when the seat is used for bigger children. Koru Kids is suitable for children from one to about six years. The TÜV-tested seat attachment can be stacked in a stack of up to six. It can be used indoors or outdoors and is easy to clean. The straps can be washed separately at 30 degrees. The child seat is available in either grey or blue and is compatible with most GO IN chair models.
