GO IN

TABLETOP **CASSIUS**

For a table with a particularly elegant look: our Cassius table top made of marble. The natural surface of Cassius has a satin finish and a water-resistant wooden base plate. The latter already has threaded inserts for our GO IN standard mounting top for easier installation. Available in a square and round version and in various sizes. Ideal for restaurants, cafés, bars and hotels. The Nero Marquina and Bianco Carrara color variants are suitable for outdoor use, while the Perlino Rosato, Verde, Rosso Levanto and Emperador Dark colors are suitable for indoor areas. The marble top complements the T12 Slim table frame perfectly. Due to the nature of the product, slight color and texture variations may occur. Avoid large temperature fluctuations. Our marble tops for outdoor use have a polished but open-pored surface. In daily use, this can be stained by penetrating liquids such as coffee and red wine, but in combination with the material properties, this further accentuates the natural appearance of the surface. If the untreated natural stone slab is not to lose its elegant appearance, it must be regularly maintained and protected from acidic liquids, as these are quickly absorbed by the pores of the stone and cannot be removed again.

- Nero Marquina and Bianco Carrara suitable for outdoor use
- very durable
- Natural stone slab with an elegant appearance
