TABLETOP SENDO A

With Sendo A, a solid teak Tabletop in slatted design is introduced – without a visible frame and with softly rounded corners for an exceptionally modern, light appearance. Steel crossbars on the underside ensure high dimensional stability and durability, even under intensive use. Among wood enthusiasts, teak is regarded as the reference material for outdoor furniture: it is weather-resistant, can remain outdoors all year round and, when untreated, develops an elegant silver-grey patina. If you wish to preserve the warm yellow-brown natural colour tone and keep the surface particularly easy to maintain, the tabletop should be treated with a suitable care oil before first use and this treatment should be refreshed regularly. The teak used comes from sustainable forestry.
