HIGH TABLE TAVON

The Tavon bar table frame was specially developed for demanding use in the catering industry and combines a robust steel construction with a high-quality black E-coating powder coating. The surface is rustproof and scratch-resistant, making it ideal for daily use in bars, bistros or hotel lounges – both indoors and outdoors. The design, featuring an appealing combination of square and round tube elements, blends harmoniously with almost any bar stool and interior design concept. Thanks to the two versions, the frame is suitable for tabletops measuring 120 cm in length as well as for spacious tabletops measuring 180 cm in length. For optimal logistics and on-site assembly, the frame is delivered disassembled and can be assembled in just a few simple steps. This keeps your project maximally flexible to plan, without compromising on stability, appearance or durability.

- Robust steel frame with black e-coating powder coating – rust-free and scratch-resistant.
- Mix of square- and round-tube design, suitable for almost all Bar stools and interior concepts.
- For intensive use in hospitality, suitable for both indoor and outdoor.
