

HIGH TABLE TAVON

The Tavon standing table frame was specially developed for demanding use in the hospitality sector and combines a robust steel construction with an elegant black e-coating powder coating. The surface is rust-free and scratch-resistant, making it ideal for daily use in bars, bistros or hotel lounges – whether indoors or outdoors. The design, featuring an exciting combination of square and round tube elements, blends harmoniously into almost any bar stool and interior concept. Thanks to the two available versions, the frame is suitable for table tops with a length of 120 cm as well as for generous tops with a length of 180 cm. For optimal logistics and on-site assembly, the frame is delivered disassembled and can be mounted in just a few simple steps. This keeps your project maximally flexible to plan, without compromising on stability, appearance or durability.

- robust steel frame with black e-coating powder coating – rust-free and scratch-resistant
- mix of square and round tube design, matching almost all bar stools and interior concepts
- suitable for intensive use in the hospitality industry, for both indoor and outdoor applications
